Kushal Sheth

Ahmedabad, Gujarat, India

(+91) 8690780780 | kushalsheth07@gmail.com | Portfolio | Github | LinkedIn

Summary

Software and AI Engineer with strong experience in backend development, data engineering, and AI-driven applications. Skilled in Python, Django/Flask, PostgreSQL, LangGraph, LangChain, and React. Built production-grade data pipelines, REST APIs, financial ingestion systems, and AI chatbots using LangGraph and RAG. Passionate about scalable systems, automation, and applying machine intelligence to real-world products.

Education

LJ University

Bachelor of Engineering - BE, Computer Science & Engineering *2022–2026*

Work Experience

Meridian Voyage *Remote, India*

Python Developer Intern *Feb 2025 – May 2025*

- Built 15+ REST APIs and integrated 4 major financial sources (FMP, FRED, EDGAR, Yahoo) to ingest high-volume market and fundamentals data.
- Designed dual PostgreSQL pipelines (Raw→Curated) handling 10+ years of 13F-HR institutional holdings for 90+ top investors.
- Created 12+ Airflow DAGs with retry logic and monitoring, improving pipeline stability by 40%.
- Implemented Medallion Architecture and developed the 13F-HR XML ingestion pipeline with CIK tracking and deduplication, reducing data redundancy by 60%.
- Built valuation, trend, and institutional analysis tools supporting batch and incremental updates.
- Implemented centralized error tracking, automated recovery flows, and real-time Email/Telegram alerts for pipeline monitoring.
- Designed 30+ relational tables with indexing, constraints, and secure API authentication across services.
- **Link:** Meridian Voyage Internship Overview

Chatcells *Remote, India*

AI LangGraph Chatbot Developer Intern [Part time] *Oct 2025 – Present*

- Developing AI chatbots using LangChain, LangGraph, and OpenAI models, contributing to core conversation and workflow logic.
- Implemented early versions of modular chatbot pipelines used for customizable customer-support bots.
- Integrated embeddings, vector search (FAISS/Chroma), and document loaders to improve knowledge-query accuracy during testing.
- Built RAG (Retrieval-Augmented Generation) flows for structured/unstructured documents, enabling reliable knowledge-based responses.
- Optimizing fallback responses, intent routing, and query understanding to improve overall bot reliability.

Tech Stack

- **Programming: Java (OOP, DS), Python (ML, DL, Data Analysis)**
- **Backend: Django, Flask, Node.js, Express.js**
- **Frontend: HTML, CSS, JavaScript, React.js, Three.js**
- **Databases: PostgreSQL, MongoDB**
- **AI/LLMs: LangChain, LangGraph, Transformers, Groq**
- **Tools: Docker, Git, Web Scraping**

Projects

Stock Dashboard — AI-Powered Financial Analysis Tool

- Tech: React, Flask, TailwindCSS, MongoDB, Machine Learning, Kinde (Google Auth)
- Built an AI-powered dashboard for retail investors to track stock performance and generate real-time insights.
- Predictive Analysis: Developed ML models for stock price forecasting using historical and technical indicators.
- Sentiment Analysis: Scraped live financial news and applied sentiment scoring for investor sentiment trends.
- Fundamental & SWOT Analysis: Integrated financial reports (balance sheet, income, cash flow) with SWOT-based evaluation.
- Technical Analysis: Included candlestick charts, moving averages, histograms, and stock comparison tools.
- Watchlist: Enabled users to bookmark and monitor their preferred stocks.
- Deployed a Botpress-based AI chatbot (MoneyBot) to assist with queries and stock-related FAQs.
- Included real-time market holiday calendar and seamless Google Authentication via Kinde.
- **Demo:** Stock Dashboard Demo

ClarityAI — AI-Powered Research and Document Analysis Platform

- Tech: Python, Streamlit, LangChain, LangGraph, Groq API, Transformers, Serper API, Tavily
- Developed an AI-driven research platform for semantic search, document analysis, Q&A, and summarization.
- Multi-Modal Search: Integrated real-time academic, web, and news search powered by LLM-based agents.
- Document Q&A: Enabled PDF/DOCX uploads with context-aware answers using transformer embeddings.
- Insight Extraction: Presented findings through dynamic visual summaries and key point synthesis.
- Dynamic Suggestions: Instantly generated research questions and synthesized insights across sources.
- Delivered real-time responses using Groq's ultra-fast inference infrastructure.
- **Live App:** ClarityAI on Streamlit

Courses & Certifications

Inheritance and Data Structures in Java
University of Pennsylvania

Database Design and Basic SQL in PostgreSQL
University of Michigan

Exploratory Data Analysis for Machine Learning
IBM

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
Oracle

Building Generative AI-Powered Applications with Python
IBM

AWS Cloud Technical Essentials
AWS
