AI CHATBOT

DETAILED CHAT FLOW – FIRST DRAFT

Project	Multi-Product AI Chatbot Platform
Channels	Insurance Websites & Portals
Document	Detailed Chat Flow – First Draft
Version	1.0

Important: Product-specific questions shown in this draft are indicative. Final questions, eligibility rules, API rules, quote logic and approved responses will be finalized separately with the respective business teams.

1. Chatbot Flow – Overall Concept

The proposed chatbot will use one common chatbot platform across multiple insurance websites and portals. The entry point and common conversation structure will remain consistent, while the questions, business rules, knowledge and journey will change according to the selected insurance product.

Step	Chatbot Flow
1	User opens chatbot
2	Welcome message is displayed
3	User selects an option or types a query
4	Chatbot identifies intent/product
5	Relevant product flow is loaded
6	Chatbot asks product-specific questions
7	Rules / APIs / knowledge base are applied
8	Chatbot provides information, captures lead or redirects user
9	Journey is completed or escalated

Initial Product Coverage

Product	Primary Chatbot Journey
Loan Protector Insurance	Product information / questions / lead or applicable journey
Bike Insurance	Vehicle details → questions → quote / lead journey
Car Insurance	Vehicle details → questions → quote / lead journey
Pet Insurance	Pet details → coverage requirement → information / lead
Jewellery Insurance	Requirement → relevant questions → information / lead
Retail Health Top-Up	Product / eligibility questions → information / lead or quote journey
Other Insurance Products	Requirement capture → lead generation → offline follow-up

2. Common Chatbot Journey

Step	User	Chatbot / System
1	Chatbot Launch	User opens chatbot widget on website/portal.
2	Welcome	Chatbot displays welcome message and relevant options.
3	Requirement Identification	User selects option or enters natural-language query.
4	Intent/Product Identification	AI or configured logic identifies relevant journey.
5	Product Flow	Configured questions, rules, knowledge and APIs are loaded.
6	Action	Information / lead / quote / redirect / human assistance.
7	Completion	Confirmation and option to start another request.

Common Options

- Get a Quote / Start a Journey
- Know More About the Product
- FAQs / Product Information
- Other Insurance Products
- Talk to an Insurance Expert / Request a Callback

3. Chatbot Opening & Welcome Flow

Step	User	Chatbot / System
1	User opens chatbot	Display welcome message.
2	User views options	Display configurable options.
3	User selects an option	Load relevant journey.
4	User types a question instead	AI identifies intent and product.

Illustrative Welcome

Bot: Hi! Welcome to Vibhuti Insurance. How can I help you today?

Options: Get Insurance | Know More | FAQs | Other Insurance Products | Talk to an Expert

Natural-Language Examples

Step	User	Chatbot / System

1	I want insurance for my new bike.	Bike Insurance journey
2	I need insurance for my pet.	Pet Insurance journey
3	I want a health top-up.	Retail Health Top-Up journey
4	I need insurance for my jewellery.	Jewellery Insurance journey
5	I need some other type of insurance.	Other Insurance Products lead journey

4. Product Selection & Intent Identification

If the chatbot cannot confidently identify the product from the user's message, it should ask a clarification question or display the product menu.

Step	User	Chatbot / System
1	User Query	Natural-language or button selection.
2	Intent Detection	Identify product and user intent.
3	Confidence Check	Determine whether routing is clear.
4	Clear	Start relevant product journey.
5	Unclear	Ask clarification / display product options.

Product Menu – First Draft

- Loan Protector Insurance
- Bike Insurance
- Car Insurance
- Pet Insurance
- Jewellery Insurance
- Retail Health Top-Up
- Other Insurance Products

Ambiguous Query Example

Step	User	Chatbot / System
1	I need insurance.	Bot: Sure. Which type of insurance are you looking for?
2	Car.	Bot: Great. Let's help you with Car Insurance.

5. Detailed Product-Specific Chat Flows

These are first drafts. Final questions and business rules will be defined separately.

5.1 Loan Protector Insurance

Step	User	Chatbot / System
1	Select Loan Protector	Start Loan Protector journey.
2	Introduction	Provide high-level product information.
3	Basic details	Capture applicable customer/loan details.
4	Product questions	Ask configured questions and validate responses.
5	Business rules	Determine next step based on responses.
6	Lead / next journey	Capture lead or redirect as applicable.
7	Completion	Show confirmation / next steps.

5.2 Bike Insurance

Step	User	Chatbot / System
1	Select Bike Insurance	Start Bike Insurance journey.
2	Registration number	Capture vehicle registration number.
3	Vehicle API	Fetch vehicle details where applicable.
4	Confirm details	Display and confirm returned vehicle information.
5	Insurance questions	Ask required product-specific questions.
6	Quote / lead	Proceed to quote or lead journey.
7	Redirect	Redirect to relevant journey where applicable.

Illustrative Conversation

Step	User	Chatbot / System
1	Let's get started with your Bike Insurance. Please enter your bike registration number.	
2	MH01AB1234	Validate and call vehicle API where applicable.
3	[Vehicle details returned]	Please confirm the details.

4	Yes	Continue to configured insurance questions.

5.3 Car Insurance

Step	User	Chatbot / System
1	Select Car Insurance	Start Car Insurance journey.
2	Registration number	Capture vehicle registration number.
3	Vehicle API	Fetch vehicle details where applicable.
4	Confirm details	Display and confirm returned vehicle information.
5	Insurance questions	Ask required product-specific questions.
6	Quote / lead	Proceed to quote or lead journey.
7	Redirect	Redirect to relevant journey where applicable.

5.4 Pet Insurance

Step	User	Chatbot / System
1	Select Pet Insurance	Start Pet Insurance journey.
2	Pet type	Capture pet type.
3	Pet details	Capture breed, age and other applicable details.
4	Coverage requirement	Capture user's requirement.
5	Product information	Provide approved product information.
6	Lead / next step	Capture lead or proceed to applicable journey.

Illustrative Conversation

Step	User	Chatbot / System
1	What type of pet would you like to insure?	Show configured options.
2	Dog	Ask breed and age.
3	[Details provided]	Ask coverage requirement.
4	[Requirement provided]	Provide approved information / capture lead.

5.5 Jewellery Insurance

Step	User	Chatbot / System
1	Select Jewellery Insurance	Start Jewellery Insurance journey.
2	Requirement	Capture insurance requirement.
3	Product questions	Ask configured questions.
4	Required details	Capture applicable information/documents if required.
5	Information / lead	Provide information and/or generate lead.
6	Completion	Confirm next steps.

5.6 Retail Health Top-Up

Step	User	Chatbot / System
1	Select Retail Health Top-Up	Start Retail Health Top-Up journey.
2	Introduction	Provide high-level product information.
3	Eligibility / requirement	Ask configured questions.
4	Coverage / plan requirement	Capture applicable requirement.
5	Product information	Provide approved information.
6	Lead / quote	Capture lead or initiate applicable quote journey.
7	Completion	Show next steps.

Illustrative Conversation

Step	User	Chatbot / System
1	You have selected Retail Health Top-Up. I can help you understand the product and capture your requirement.	
2	[User provides details]	Ask configured eligibility/requirement questions.
3	[User completes questions]	Provide approved information and proceed to lead/quote journey.

6. Other Insurance Products – Detailed Lead Generation Flow

This journey is used when the user's insurance requirement does not have a dedicated automated product journey. The chatbot should capture the requirement and generate a lead for offline handling.

Step	User	Chatbot / System
1	Select Other Insurance Products	Start generic lead flow.
2	Ask insurance requirement	Capture what type of insurance the user needs.
3	Capture customer details	Name, mobile, email and applicable fields.
4	Validate	Validate mandatory fields.
5	Confirm	Display captured requirement/details where applicable.
6	Generate lead	Create lead with chatbot/source/session information.
7	Forward / assign	Send to concerned team/person where integration is available.
8	Offline follow-up	Concerned team handles the requirement.

Illustrative Conversation

Step	User	Chatbot / System
1	I need some other type of insurance.	Bot: Sure. What type of insurance are you looking for?
2	I need insurance for my camera equipment.	Capture insurance requirement.
3	Please provide your name.	User provides name.
4	Please provide your mobile number.	User provides mobile number; validate.
5	Please provide your email ID.	User provides email; validate.
6	Please confirm your requirement: Camera Equipment Insurance.	User confirms.
7	Thank you. Your request has been registered. Our concerned team will get in touch with you.	Generate and route lead.

Indicative Lead Fields

- Lead ID
- Customer Name

- Mobile Number
- Email ID
- Insurance Requirement
- Product/Category
- Location, where applicable
- Website/Portal
- Source
- Chatbot Session ID
- Date & Time
- Lead Status

7. FAQ / Knowledge-Based Flow

Step	User	Chatbot / System
1	User asks question	Identify product/context.
2	Search approved knowledge	Search product-specific FAQ/knowledge base.
3	Answer found	Provide approved answer.
4	No answer	Use fallback response.
5	Further help	Offer relevant options / expert assistance.

Illustrative Conversation

Step	User	Chatbot / System
1	What is covered under Pet Insurance?	Search approved Pet Insurance knowledge.
2	[Approved answer]	Continue conversation.
3	I have another question.	Ask the user for the next question.

8. API-Driven Conversation Flow

Step	User	Chatbot / System
1	Capture input	Example: vehicle registration number.
2	Validate input	Check mandatory/format rules.
3	Call API	Invoke configured API.
4	Process response	Map required response fields.

5	Display result	Show relevant result to user.
6	Continue journey	Ask next question / action.
7	API failure	Show user-friendly message and configured fallback.

Illustrative Motor API Flow

Step	User	Chatbot / System
1	Enter your vehicle registration number.	
2	MH01AB1234	System validates and calls vehicle API.
3	We found your vehicle details. Please confirm them.	Display mapped vehicle details.
4	Confirmed	Continue to next configured question.

9. Fallback & Human Assistance Flow

Step	User	Chatbot / System
1	Query not understood	Ask user to rephrase.
2	Still not understood	Display relevant predefined options.
3	Still unresolved	Offer expert/callback option.
4	User accepts	Capture required contact details.
5	Lead / handover	Send to configured team/channel.

Illustrative Conversation

Step	User	Chatbot / System
1	[Unsupported/unclear query]	I'm sorry, I couldn't understand that. Could you rephrase your question?
2	[Still unclear]	You can choose: Product Information | Get a Quote | Talk to an Expert
3	Talk to an Expert	Please provide your name and mobile number.
4	[Details provided]	Thank you. Your request has been registered for follow-up.

10. Common Lead Capture Flow

Step	User	Chatbot / System
1	Lead opportunity identified	Journey requires lead capture.
2	Collect fields	Capture common and product-specific fields.
3	Validate	Validate mandatory fields.
4	Confirm	Show summary where applicable.
5	Create lead	Create lead record.
6	Integrate	Push to CRM/lead system where applicable.
7	Confirmation	Confirm registration to user.

Lead Sources

- Product-specific journey
- Other Insurance Products
- Callback / Expert request
- Unresolved query escalation, where configured

11. Journey Completion & Restart

11.1 Completion

Step	User	Chatbot / System
1	[Journey completed]	Thank you. Your request has been captured.
2	Would you like help with anything else?	[Yes] [No]
3	No	Thank you for contacting Vibhuti Insurance. Have a great day!

11.2 Restart

Step	User	Chatbot / System
1	I want to check something else.	Start a new request.
2	Sure. What can I help you with?	Display relevant options.

11.3 Session Timeout

If the user remains inactive beyond the configured session timeout, the chatbot should display a session-expiry message and provide an option to restart the journey.

12. First-Draft Notes

- This is a first draft and is intended to demonstrate the proposed customer experience and routing logic.
- The exact product questions, eligibility rules, API fields, quote logic and final response wording are to be finalized separately.
- The common chatbot structure should remain reusable across all products and websites/portals.
- Other Insurance Products is intended as a lead-generation flow with offline follow-up rather than a full automated product journey.
- Once the overall flow is approved, detailed product-wise conversation scripts can be prepared for development and vendor estimation.
